DETAILED ACTION

Claim Objections

1. Claim 27 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form, or rewrite the claim in independent form. Claim 27 states the substituents are selected to provide an emitted light with an orange-red hue. It is not seen how claim 27 further limits parent claim 1, since claim 1 states the derivative is orange-red light emitting. Clarification and/or correction are requested.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 7-24, 27, and 29-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. With regard to claims 7-9, the variable “n” may be zero in each of these claims. If the variable “n” is zero, it is assumed that the phenyl ring at the 6- and 12- positions is not substituted. When “n” is zero, the compounds of claims 7-9 are outside the scope of claim 1, upon which these claims depend. Claim 1, Formula (I) requires the phenyl rings at the 6- and 12- positions be substituted. Accordingly, claims 7-9 and claims depending upon claims 7-9 are indefinite.

5. With regard to claim 32, compounds Inv-1 and Inv-17 are outside the scope of Formula (I) set forth in claim 1, upon which claim 32 depends. Neither Inv-1 or Inv-17 is substituted on the 6- and 12- position phenyl rings. Accordingly claim 32 is considered indefinite.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-37 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-32 and 36-38 of copending Application No. 10/700,894. Although the conflicting claims are not identical, they are not patentably distinct from each other because application '894 recites specific inventive compounds (for example, Inv-23 in claim 27) in an electroluminescent device that read upon Formula (I) of present claim 1 and Formula (I) of claim 33.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
